Ahmed Gamal

Senior Testing Engineer @ CME | Automated Software Testing
Cairo, Egypt

Summary

At CME, our team prioritizes high-quality software delivery through meticulous testing and defect tracking. Leveraging automated testing expertise, I contribute to refining user experiences across diverse applications, including web, mobile, and AI-driven platforms. My proficiency in SQL enhances our ability to conduct thorough data validations, ensuring the integrity of every product we release.

Collaborative efforts are at the core of our success; by working closely with cross-functional teams, we translate technical specifications into comprehensive test plans. This approach has enabled us to maintain exceptional standards of product excellence, resulting in heightened client satisfaction and a solid track record of robust software solutions within the transportation industry.

Experience

CME
Senior Test Engineer
April 2025 - Present (2 months)

Transflo
Senior Testing Engineer
January 2024 - Present (1 year 5 months)
United States

Write test scripts and prepare test checklists for user stories.
• Report Bugs: report clear bugs and track them using tools like DevOps.
• Perform manual and automated testing to identify and report defects.
• Write and execute SQL queries/scripts.
• Worked on several projects (Transportation App, Web App, Mobile App, AI workflow App…)
• Execute manual and automated functional and non-functional tests for Web, REST API, and Mobile applications.

MicrotecSaudi
Software Test Engineer
October 2022 - May 2024 (1 year 8 months)

-Lead and manage a team of QA engineers to ensure the quality of our hardware with software

products to cover all business case requirements.
-Design and develop test plans and test cases based on functional and technical specifications.
-Prepare and present reports on the quality of our software products to management.
-Collaborate with cross-functional teams to ensure the quality of our software products.

AL-ALAMEYA
Quality Assurance Automation Engineer
June 2021 - July 2022 (1 year 2 months)
Cairo, Egypt

Integrate the quality and testing processes into the overall software methodology.
Create test environments.
Do automation testing using tools like selenium
For UI testing by writing Test scripts using java.
Used maven for management, building and dependencies to my projects.
Used TestNg as test runner Framework and create DDT.
Create traceability records, from test cases back to requirements. Can report on system quality and collects metrics on test cases.
Project (Shopping website) using Selenium, Java, maven
testing, and POM
